## OBJECTIVE

---

Disciplined individual with in-depth knowledge of software development, seeking a software developer position in a company where I can use my skills to the success of the company while being able to expand my expertise.

## EXPERIENCE

---

### Full-Stack Software Engineer | OnPoint Community Credit Union | 2019 - 2022

- Created exceptional user interfaces; synced UI with back-end data display; designed reusable styling, colors, and interface and optimized website navigation
- End-to-end web development using C#, .NET, Html/Css, SQL and Javascript/Jquery to build front end architecture, back-end applications, and user interface, following a scrum based approach
- Optimized outdated tracking processes by creating web applications using C# and .NET Core that saved 20 hrs of workload per week for the organization
- Worked with back end data to create dynamic web pages using Javascript/Jquery

### Software Developer | Deloitte | 2018 - 2019

- Handled API testing for large state project
- Wrote complex SQL queries for data creation testing
- Created chrome extension to auto populate forms for testing using JS, saving minutes each test
- Collaboration across many teams to ensure proper planning for future

### Software Developer | The Tech Academy | 2018

- Responsible for the UI design of the new job dashboard for the learning management system and ensuring the overall layout design meets cross-device compatibility
- Application development across multiple projects simultaneously using Jira and TFS for project management
- Design, develop, test, debug, and implement new features in applications with crud functionality using MVC
- Refactor code to be more scalable and meet best practice standards across all applications

## TECHNICAL SKILLS

---

**Front-end:** JavaScript/Typescript, React, NextJs, Html/Css, Bootstrap/Mui/Tailwind/Styled Components

**Back-end:** C#, .NET, Sql, Entity framework, Prisma, tRPC

**Tools:** AWS, TFS, Git, Github, Postman, and Developer Tools

**Project Management:** Agile/Scrum/Waterfall

## SOFTWARE PROJECTS

---

### Youtube Clone

- Using React, MUI, and rapidAPI I built a youtube clone with searching/filtering, a channel page, and a video player
- Best practice file structure and react-router for smooth routing with react hooks to handle data

### Portfolio Site

- Personal website created with React, NextJs and styled components
- 100% performance score on lighthouse

### Mp3 Converter

- Download a mp3 file from a youtube video using the url. Built with node.js and express

## EDUCATION

---

**Certified Web Developer | The Tech Academy | Portland, OR | 2018**
